Overview of features

Welcome screen

The color display is automatically activated when a person approaches the door station.

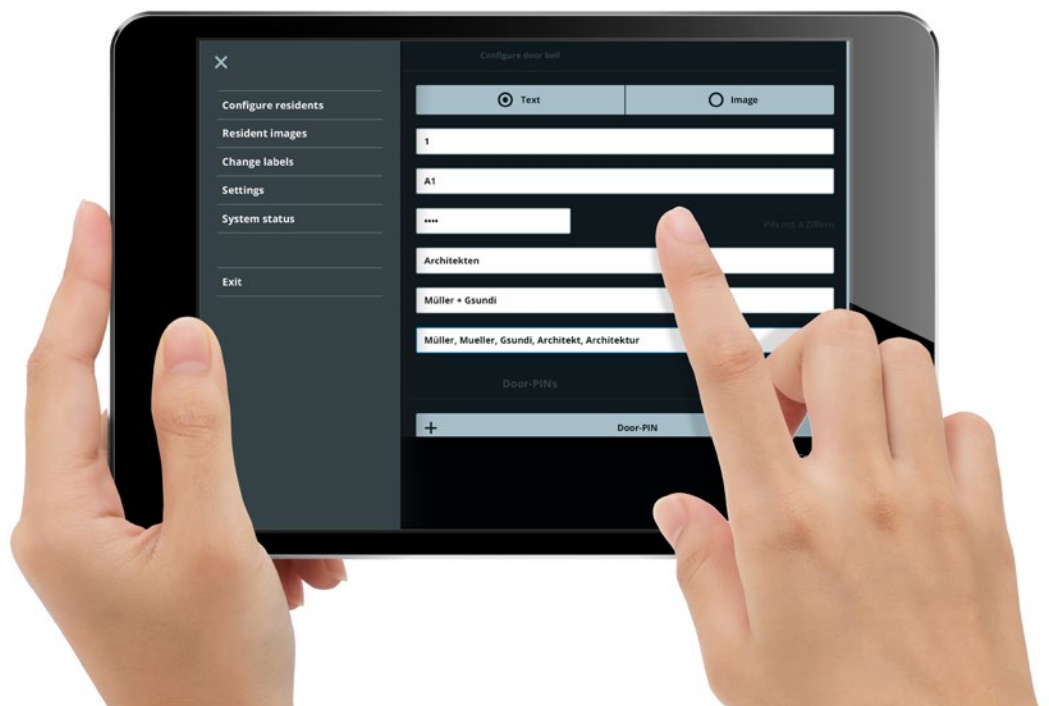

Due to the tree structure entries are easily found

At a central entrance the individual residents of the building may be assigned to a level (e.g., houses 1 to 8 in a residential complex).

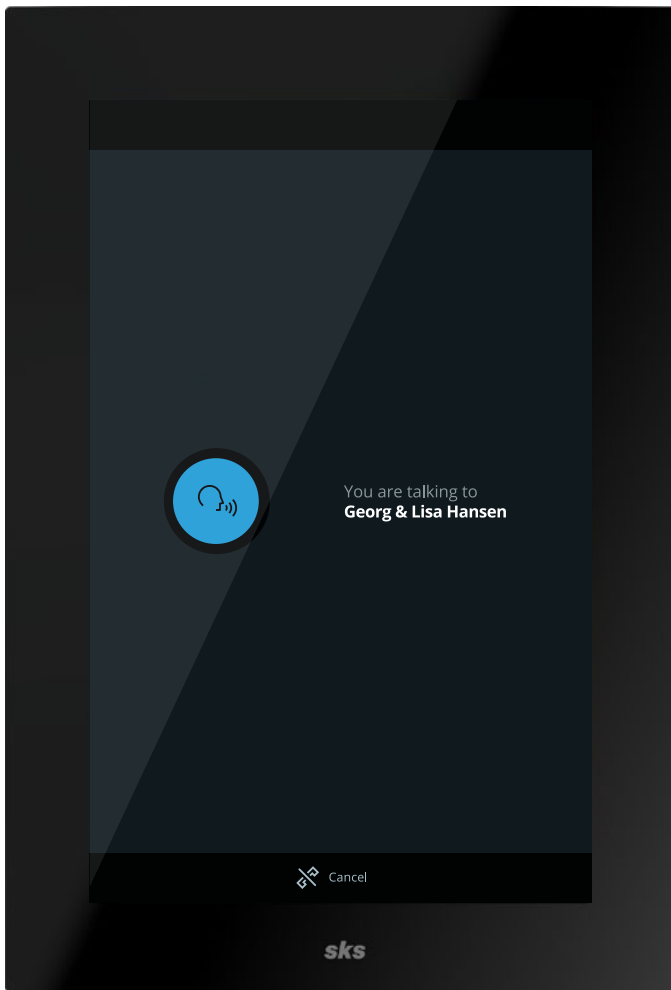

Start-up/configuration

Easy start-up and configuration via the Web interface, using a tablet or PC/laptop.

There is also the option of configuration directly at the door station.

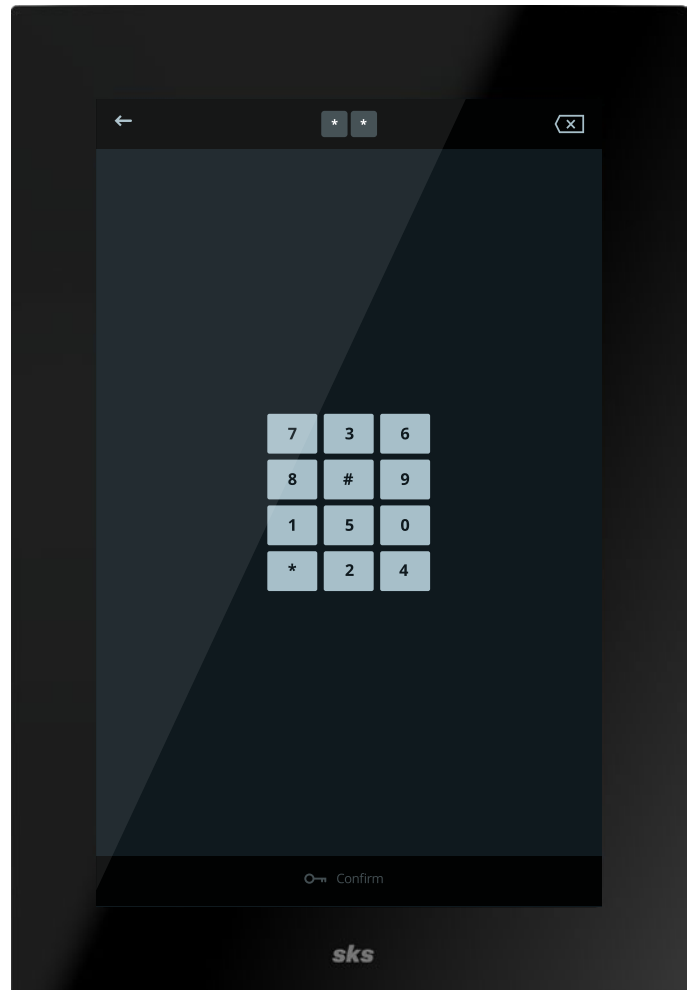

Overview of features

Barrier free communication (DIN 18040)

In compliance with the latest DIN 18040 regulation – the door station provides the hearing impaired with visual indication of its current state on the display (symbols and text). The text “knocking at” appears once the door bell has been rung. The text “you are talking to...” appears once the call has been answered and is followed by “door open” if the door opener has been activated.

Virtual code lock – maximum security

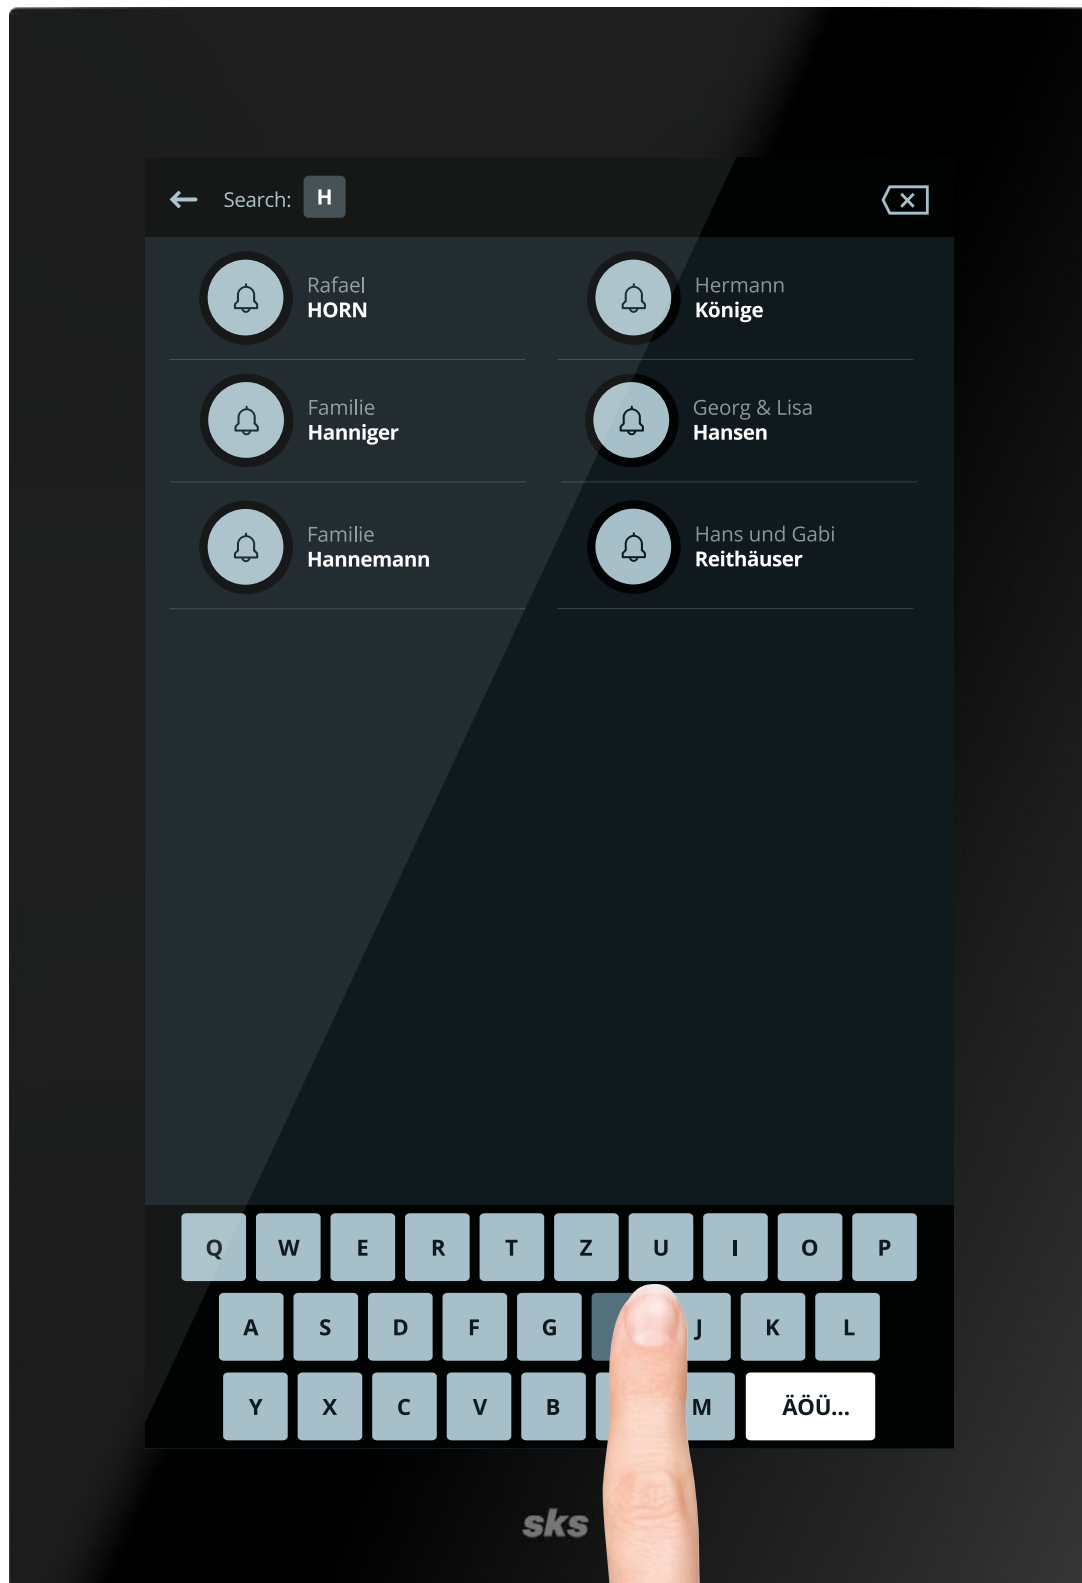

Via the virtual code lock function the COMFORT door station may also be used to open the front door. Enhanced security is provided as the numbers (0-9 in the key pad display) can be automatically shuffled after each use.

Please find all information
in our COMFORT-Film.

Overview of features

Comfort search function

Especially useful in apartment complexes, high-rise-buildings or office buildings, names can be found quickly with the help of a search function and virtual keyboard.

The ideal combination

For outdoor use SKS manufactures a variety of door stations, pillars and letter box units that are individually tailored to the customer's requirements. These units are available in a variety of materials and can be delivered within a very short time.

Stainless steel pillar with
