NEW

VICO – Flawless elegance in real glass

The new SKS video indoor station VICO hands-free is characterized by a high-quality real glass surface and, with its puristic design, forms a stylish detail that enriches every living environment.

It excels with its elegant, flat surface-mounted housing, which protudes only 17 mm over the wall and is easy and intuitive to use for every age group.

VICO Highlights

The VICO is equipped with a big high resolution 5“ color touch display that is activated when a door call comes in and shows a high resolution video image from the door station. Additionally to that the door call is signalled by lighting up the three keys accepting a call, muting and door opener and by playing the ringtone. Excellent and clear transmission of speech as well as the privacy function during an active door call go without saying.

All other functions, such as settings of ringtones, ringtone volume, color, contrast and brightness are made in the intuitive and clearly structured menu. Here the resident can choose German or English as the menu language.

The optional image storage function of the VICO improves the residents' feeling of security. If it is activated, a camera image of the visitor is stored for every incoming door call. By checking the image memory the user hence can keep control of who has called in during his absence.

VICO Functional overview

Call menu

When a door or floor call comes in the camera images automatically displayed. When touching the display the call menu is opened. Using this you can change into the main menu, activate special functions like opening a floor door or calling the concierge (only with additional switching actuator or BUS actuator module) or – if installed – turn on the image memory function.

Main menu

Using the main menu all other functions and settings are done, as e. g. brightness, contrast, internal call addresses, volume of ringtone and speech and many more.

Muting

Muting is done intuitively via the clearly structured menu. The duration of the muting can be chosen by the resident. After that chosen time span (at the latest after 24 hours) the ringtone is automatically switched back on.

Image storage

The optional image storage function of the VICO (usage is only possible in connection with item 300102) improves the residents' feeling of security. Are the technical functions given, a camera image of the visitor is stored for every incoming door call. Thus the user can keep control of who has called in during his absence.

VICO Features

- SKS BUS technology
- Real glass surface
- Capacitive tactile sensor for accepting calls, opening doors and muting (ringtone is automatically reactivated after the chosen time span, after a maximum of 24 hours)
- Further settings like changing the ringtone volume or ringtone melody, colour, contrast and brightness settings are done via the 5" touch display
- Optical signalling of calls by the sensor keys
- Automatic door opener function
- One-man installation and programming
- Optionally parallel operation of up to 3 indoor stations
- Key functions in the menu are password protected, so they can not be changed unintentionally
- „Vanishing print“: Keys appear automatically when a door call comes in or the display is touched
- All in all 12 ringtone melodies for door, floor and internal calls
- Ringtone volume adjustable
- Menu language in German or English
- Hands-free operation
- Audio and video privacy function
- Internal call function
- Optional image memory function (Usage is only possible in connection with item 300102)
- Surface-mounting (Installation on FM- or inwall box necessary)
